Use and Circulation

Rules for county circulation

- The circulation should be accurately recorded each day, counting one for each lending for home use of a bound volume, pamphlet or unbound periodical.
- Renewals of volumes under library rules should also be counted, but no increase should be made because volumes are read by others or for any other reason.
- In all cases volumes issued from library agencies (such as branches and deposit stations) for home use should be counted only according to their accurately recorded circulation from the agency, disregarding the act of sending them from the library to the agency and disregarding their use in the agency. But volumes issued by the library to a teacher or other individual or organization for the use of pupils or other persons may be counted as part of the library's circulation if no accurate record of the circulation of the books is kept and reported by the individual or organization which borrowed the books from the library. In no case should there be any estimate of circulation.
- Volumes lent for pay (pay duplicate collection) should be reported separately in the space provided.
